

LINEUP MANAGEMENT QUIZ

The opposing coaches walk up to you and make 20 statements in the order given below. You must rule each change as **OK** or **ILLEGAL**.

Record any changes on the lineup cards exactly as you would in a game. When a player leaves the lineup, either as a starter or as a substitute, but has the opportunity to re-enter, circle the players number. When a player leaves the lineup and may not re-enter, X the players number. When a player changes position, slash the players position and write in the new position number.

OK means it is insignificant, it is already happening, you can legally make it happen, or you will allow it.

ILLEGAL means you will **not** allow the change. At the bottom of the page, under comments, explain why you will not allow the change.
